0	<i>Preface</i>	11
1	<i>The Real and Complex Number System</i>	13
	<i>Introduction</i>	13
	<i>Ordered Sets</i>	13
	<i>Fields</i>	13
	<i>The Real Field</i>	13
	<i>The Extended Real Number System</i>	13
	<i>The Complex Field</i>	13
	<i>Euclidean Spaces</i>	13
	<i>Appendix</i>	13
2	<i>Basic Topology</i>	15
	<i>Finite, Countable, and Uncountable Sets</i>	15
	<i>Metric Spaces</i>	15
	<i>Compact Sets</i>	15
	<i>Perfect Sets</i>	15
	<i>Connected Sets</i>	15
3	<i>Numerical Sequences and Series</i>	17
	<i>Convergent Sequences</i>	17
	<i>Subsequences</i>	17

<i>Cauchy Sequences</i>	17
<i>Upper and Lower Limits</i>	17
<i>Some Special Sequences</i>	17
<i>Series</i>	17
<i>Series of Nonnegative Terms</i>	17
<i>The Number <math>e</math></i>	17
<i>The Root and Ratio Tests</i>	18
<i>Power Series</i>	18
<i>Summations by Parts</i>	18
<i>Absolute Convergence</i>	18
<i>Addition and Multiplication of Series</i>	18
<i>Rearrangements</i>	18

## 4 *Continuity* 19

<i>Limits of Functions</i>	19
<i>Continuous Functions</i>	19
<i>Continuity and Compactness</i>	19
<i>Continuity and Connectedness</i>	19
<i>Discontinuities</i>	19
<i>Monotonic Functions</i>	19
<i>Infinite Limits and Limits at Infinity</i>	19

## 5 *Differentiation* 21

<i>The Derivative of a Real Function</i>	21
<i>Mean Value Theorem</i>	21
<i>The Continuity of Derivatives</i>	21
<i>L'Hospital's Rule</i>	21
<i>Derivatives of Higher Order</i>	21
<i>Taylor's Theorem</i>	21
<i>Differentiation of Vector-valued Functions</i>	21

6	<i>The Riemann-Stieltjes Integral</i>	23
	<i>Definition and Existence of the Integral</i>	23
	<i>Properties of the Integral</i>	23
	<i>Integration and Differentiation</i>	23
	<i>Integration of Vector-valued Functions</i>	23
	<i>Rectifiable Curves</i>	23
7	<i>Sequences and Series of Functions</i>	25
	<i>Discussion of Main Problem</i>	25
	<i>Uniform Convergence</i>	25
	<i>Uniform Convergence and Continuity</i>	25
	<i>Uniform Convergence and Integration</i>	25
	<i>Uniform Convergence and Differentiation</i>	25
	<i>Equicontinuous Families of Functions</i>	25
	<i>The Stone-Weierstrass Theorem</i>	25
8	<i>Some Special Functions</i>	27
	<i>Power Series</i>	27
	<i>The Exponentiation and Logarithmic Functions</i>	27
	<i>The Trigonometric Functions</i>	27
	<i>The Algebraic Completeness of the Complex Field</i>	27
	<i>Fourier Series</i>	27
	<i>The Gamma Function</i>	27
9	<i>Functions of Several Variables</i>	29
	<i>Linear Transformations</i>	29
	<i>Differentiation</i>	29
	<i>The Contraction Principle</i>	29
	<i>The Inverse Function Theorem</i>	29
	<i>The Implicit Function Theorem</i>	29

	<i>The Rank Theorem</i>	29
	<i>Determinants</i>	29
	<i>Derivatives of Higher Order</i>	29
	<i>Differentiation of Integrals</i>	30
10	<i>Integration of Differential Forms</i>	31
	<i>Integration</i>	31
	<i>Primitive Mappings</i>	31
	<i>Partitions of Unity</i>	31
	<i>Change of Variables</i>	31
	<i>Differential Forms</i>	31
	<i>Simplexes and Chains</i>	31
	<i>Stokes' Theorem</i>	31
	<i>Closed Forms and Exact Forms</i>	31
	<i>Vector Analysis</i>	32
11	<i>The Lebesgue Theory</i>	33
	<i>Set Functions</i>	33
	<i>Constructions of the Lebesgue Measure</i>	33
	<i>Measure Spaces</i>	33
	<i>Measurable Functions</i>	33
	<i>Simple Functions</i>	33
	<i>Integration</i>	33
	<i>Comparison with the Riemann Integral</i>	33
	<i>Integration of Complex Functions</i>	33
	<i>Functions of Class <math>\mathcal{L}^2</math></i>	34

*Todo list*

*o*

*Preface*

# *1*

## *The Real and Complex Number System*

### *Introduction*

filler content...

### *Ordered Sets*

filler content...

### *Fields*

filler content...

### *The Real Field*

filler content...

### *The Extended Real Number System*

filler content...

### *The Complex Field*

filler content...

### *Euclidean Spaces*

filler content...

### *Appendix*

filler content...

## 2

# *Basic Topology*

### *Finite, Countable, and Uncountable Sets*

filler content...

### *Metric Spaces*

filler content...

### *Compact Sets*

filler content...

### *Perfect Sets*

filler content...

### *Connected Sets*

filler content...

# 3

## *Numerical Sequences and Series*

### *Convergent Sequences*

filler content...

### *Subsequences*

filler content...

### *Cauchy Sequences*

filler content...

### *Upper and Lower Limits*

filler content...

### *Some Special Sequences*

filler content...

### *Series*

filler content...

### *Series of Nonnegative Terms*

filler content...

### *The Number $e$*

filler content...

*The Root and Ratio Tests*

filler content...

*Power Series*

filler content...

*Summations by Parts*

filler content...

*Absolute Convergence*

filler content...

*Addition and Multiplication of Series*

filler content...

*Rearrangements*

filler content...

# 4

## *Continuity*

### *Limits of Functions*

filler content...

### *Continuous Functions*

filler content...

### *Continuity and Compactness*

filler content...

### *Continuity and Connectedness*

filler content...

### *Discontinuities*

filler content...

### *Monotonic Functions*

filler content...

### *Infinite Limits and Limits at Infinity*

filler content...

# 5

## *Differentiation*

### *The Derivative of a Real Function*

filler content...

### *Mean Value Theorem*

filler content...

### *The Continuity of Derivatives*

filler content...

### *L'Hospital's Rule*

filler content...

### *Derivatives of Higher Order*

filler content...

### *Taylor's Theorem*

filler content...

### *Differentiation of Vector-valued Functions*

filler content...

# 6

## *The Riemann-Stieltjes Integral*

### *Definition and Existence of the Integral*

filler content...

### *Properties of the Integral*

filler content...

### *Integration and Differentiation*

filler content...

### *Integration of Vector-valued Functions*

filler content...

### *Rectifiable Curves*

filler content...

# 7

## *Sequences and Series of Functions*

### *Discussion of Main Problem*

filler content...

### *Uniform Convergence*

filler content...

### *Uniform Convergence and Continuity*

filler content...

### *Uniform Convergence and Integration*

filler content...

### *Uniform Convergence and Differentiation*

filler content...

### *Equicontinuous Families of Functions*

filler content...

### *The Stone-Weierstrass Theorem*

filler content...

# 8

## *Some Special Functions*

### *Power Series*

filler content...

### *The Exponentiation and Logarithmic Functions*

filler content...

### *The Trigonometric Functions*

filler content...

### *The Algebraic Completeness of the Complex Field*

filler content...

### *Fourier Series*

filler content...

### *The Gamma Function*

filler content...

# 9

## *Functions of Several Variables*

### *Linear Transformations*

filler content...

### *Differentiation*

filler content...

### *The Contraction Principle*

filler content...

### *The Inverse Function Theorem*

filler content...

### *The Implicit Function Theorem*

filler content...

### *The Rank Theorem*

filler content...

### *Determinants*

filler content...

### *Derivatives of Higher Order*

filler content...

*Differentiation of Integrals*

filler content...

10

## *Integration of Differential Forms*

*Integration*

filler content...

*Primitive Mappings*

filler content...

*Partitions of Unity*

filler content...

*Change of Variables*

filler content...

*Differential Forms*

filler content...

*Simplexes and Chains*

filler content...

*Stokes' Theorem*

filler content...

*Closed Forms and Exact Forms*

filler content...

*Vector Analysis*

filler content...

## **11**

# *The Lebesgue Theory*

### *Set Functions*

filler content...

### *Constructions of the Lebesgue Measure*

filler content...

### *Measure Spaces*

filler content...

### *Measurable Functions*

filler content...

### *Simple Functions*

filler content...

### *Integration*

filler content...

### *Comparison with the Riemann Integral*

filler content...

### *Integration of Complex Functions*

filler content...

*Functions of Class  $\mathcal{L}^2$*
